Issues

Title: updates service_dir path change upon cloning

Description: If updates service_dir 's path seems to change ,

Remediation steps: add a .var to the end to complete its path

Title : accidental vagrant halt while running script

Description: accidentality halting vagrant while ssh

Remediation: vagrant up, vagrant ssh

Title: password's unable to access file.

Description: keys for web.yml not working

Remediation: clone original cit-360 and look into web.yml the key should be at the top.
